

Go Inside A Bubble Wand - (2-Person Operated, Over-the-Head) – Adult Use Only

Materials: Wood, PVC tube, string

Create giant, person-sized bubbles with this 2-person-operated wand. Designed for adult use only. Ideal for putting children, adults, or people in wheelchairs *inside* a bubble!

Watch Demo Video:

How to Use:

1. **2 adults are required.** The wand has 4 handles—each adult holds 2.
2. Unwind the string fully and untangle it to form a clear square.
3. Operators must move in sync with smooth, steady motions. Do **not** shake the wand.
4. Ask the person going inside the bubble to **look down or straight ahead** (not up) to avoid drips in eyes.
5. Once in position, both adults should dip the rope into the bubble solution **together**. On first use, press the rope into the solution—but **don't stir or shake**, as this creates foam.
6. Once soaked, lift the wand straight up **together**, keeping all ends aligned.
7. Open the wand slowly over the person's head (remind them to look down or across).
8. If the rope isn't fully coated, re-dip.
9. In a smooth downward sweep, bring the wand down to form the bubble.

Important Notes:

1. Dry surfaces (e.g., sticks, clothing, or dust) will pop bubbles.
2. Bubbles take practice—have fun and try a few runs before performing.
3. 💡 **Top Tip:** Only *dip and lift*. Stirring causes foam, which weakens bubbles. If foamy, skim off the foam or let it settle.

Safety & Usage Tips

- Use only in **safe, enclosed areas**. Remove trip hazards beforehand.
- **Indoor use:** Protect floors with a waterproof cover (e.g. picnic blanket). Clean spills immediately to prevent slips.
- **Outdoor use:** Best used on calm days. In windy conditions, the wand creates fun giant bubbles instead.

Cleaning & Storage:

- **Wand:** Rinse with water, air dry, wind the string back after use.

WARNINGS

- **Adult operation only** – never allow children to operate the wand. Improper use may put children at risk – always supervise closely.
- Not for children under 3 (choking hazard).
- Strangulation hazard – contains string.
- Slip hazard – clean floors immediately.
- Avoid eye contact with solution. Rinse immediately if splashed..
- Store all materials out of reach of children and pets.
- Clean and inspect wooden parts regularly. Do not use if broken.
