

Scan for a BIG bubble recipe

Teacher Resource - Bubble Science Reflection Sheet

Why are the bubbles big?

What makes it stretchy?

1. **Water**
2. **Soap** (we love Fairy Liquid!)
3. **A polymer** (a stretchy helper!)

A polymer makes the bubble super stretchy and strong.

What makes a bubble pop?

Dry hands?

Wet hands?

Bubbles pop on dry things!

What bubble shapes can you make?

Bubbles stick because of water! (cohesion)

Water likes to stick to things — like raindrops on windows.
